Feedback to participants on the course evaluation for the PhD course Research Funding 2023

Thank you for taking your time to complete the course evaluation. Your feedback is valuable input for deciding whether to give the course again in 2024 and onwards, and how it could be further developed.

Feedback on evaluation results

Overall, we are satisfied with the evaluation results, both the positive feedback and what you have identified as areas for improvement.

Reflection on the implementation of the course

Overall, we are satisfied, but have identified areas for development. We agree with your feedback that some parts became a bit rushed and other parts a bit too time consuming. We have also reflected on other things, such as the length and number of seminars and the time span between seminars.

Reflection on the course's examinations

Overall, we are satisfied with the examinations and your deliveries. It is good to get the feedback that most of you thinks the workload was reasonable.

Possible development

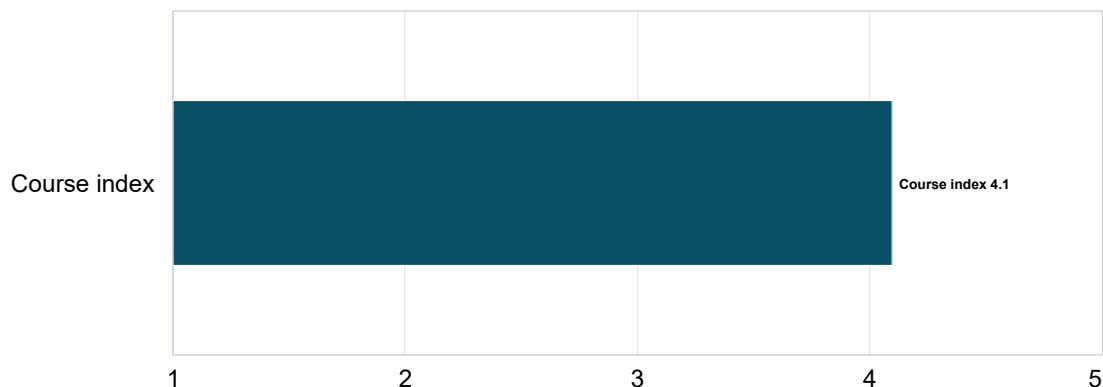

To further develop the course, we will look at your input, our own analysis, as well as all the feedback and questions you raised during the seminars. Altogether this gives us valuable input to further develop the course in terms of content, structure, teaching support and examination. The world of research funding is constantly developing and therefore a course like this needs to be up to date. But overall, we believe we have a good foundation to build on.

If you have more comments or reflections on the course, feel free to contact me.

Do you have any wishes for future PhD courses in any area that could be given for PhD students at BTH?

Do you have any wishes for future PhD courses in any area that could be given for PhD students at BTH?

Maybe a workshop on finding and applying to calls that are relevant to Ph.D. students (e.g., mobility grants) would be a great hands-on addition to this course.

Ethics

a strong IP, open data course that really mapped out the landscape of both and the role they will play going forward in our research careers and careers beyond research.

In general, I think there is a lack of technical courses that can be offered regularly to PhD students at BTH - course which can be helpful in our research work.

It's tough to complete the amount required credits in some programs.

Often one needs to create small projects or combine them with online courses, e.g., Coursera, and search for summer schools, etc.
